Education

Indian Institute of Information Technology (IIIT) Kota

Nov 2022 – Jun 2026

Bachelor of Technology in Computer Science (7.38 CGPA)

Kota, Rajasthan

Experience

Xelron – Project Marlin (V2 and V3)

Jan 2025 – Present

SDE Intern

Remote

- Contributed to AI-assisted software engineering workflows involving LLM prompting, repository analysis, debugging, code review, and structured evaluation across 15+ production-scale multi-language codebases, improving issue identification and validation efficiency by 30%.
- Acquired practical exposure to Generative AI paradigms, prompt engineering, LangChain orchestration, REST API integrations, development environments, and inference pipelines, building and testing 10+ AI-powered workflow prototypes used in modern full-stack architectures.
- Reinforced full-stack engineering proficiency by validating 200+ model-generated outputs, inspecting backend/frontend implementations, executing automated testing workflows, and analyzing scalable AI-integrated applications.

Projects

Creatr  | Next.js 16, Convex, Clerk, Google Gemini, ImageKit, shadcn/ui, React Quill, Chart.js Nov 2025

- Engineered an AI-assisted publishing platform using **Next.js 16**, **JavaScript**, and **Google Gemini**, enabling intelligent content generation, semantic enrichment, and creator discovery workflows.
- Integrated contextual headline synthesis and SEO-aware drafting pipelines, reducing repetitive manual authoring effort by approximately **60%**.
- Refined low-latency real-time synchronization through **Convex**, enabling instantaneous feed refreshes, live engagement tracking, and event-consistent state propagation across active sessions.
- Constructed secure authentication and performance-focused UI infrastructure using **Clerk**, **ImageKit**, **React Quill**, **Tailwind CSS**, and **shadcn/ui**, improving media delivery efficiency and adaptive user experience resilience.

Youtify  | React, Zustand, Node.js, Express, MongoDB, Socket.IO, Cloudinary, shadcn/ui, Clerk Mar 2025

- Orchestrated a distributed audio ingestion and dissemination platform with a polymorphic, ACL-governed control plane orchestrating **500+ media descriptors** and catalog normalization workflows.
- Devised full-duplex, event-driven transport layers using **Socket.IO**, sustaining **50+ persistent websocket sessions** with stateful channel multiplexing and low-latency packet propagation.
- Provisioned **Clerk** with hierarchical RBAC primitives and session-bound authorization guards and configured deployment-compatible runtime environments.
- Streamlined datastore access paths through indexed **MongoDB** aggregation pipelines and restructured **Express.js** middleware execution chains, reducing administrative endpoint RTT by approximately **35%**.

Technical Skills

Programming Languages: Python, JavaScript, Java, C++, SQL

AI / Generative AI: LangChain, LangGraph, Agentic AI, RAG (Retrieval-Augmented Generation), Prompt Engineering, AI Agents, OpenAI API, Hugging Face Transformers, Vector Databases, Embeddings, Tokenization

Frontend Development: React.js, Next.js, Tailwind CSS, Zustand, Three.js

Backend Development: Node.js, Express.js, REST APIs, Socket.IO, Authentication, Supabase, Clerk

Developer Tools & Platforms: Git, GitHub, Docker, Postman API, VS Code, Vercel, MongoDB Atlas, Cloudinary

Relevant Coursework

- Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Computer Networks, Software Engineering, Machine Learning, Deep Learning, Natural Language Processing

Achievements and Certifications

- Achieved **Knight** rank on LeetCode with a maximum rating of **1864**. 
- Solved **1000+** algorithmic problems across multiple coding platforms with strong proficiency in Greedy Algorithms, Dynamic Programming, Graph Theory, and advanced algorithmic reasoning. 
- Achieved **Pupil** rank with a max rating of **1303** on Codeforces. 
- Certified in **HackerRank Algorithmic Reasoning (Basic & Intermediate)**. [\[View\]](#)
